This diagram illustrates the assembly of a LEGO Technic car chassis. On the left, a sub-assembly consisting of a green 1x12 plate with orange 1x4 and 1x6 plates attached, and two grey axles with black wheels, is shown. Two black arrows point from this sub-assembly to the main chassis on the right. The main chassis is a more complex structure featuring a grey motor, a black gear, a large black wheel, and various other Technic components like blue and grey beams and plates. The sub-assembly is being positioned to be attached to the bottom of the main chassis.
