

The image shows a LEGO WeDo 2.0 robot built to look like Rudolph the Red-Nosed Reindeer. The robot's head is a grey Technic beam with a red light on the nose, green and orange Technic bricks for antlers, and a clear lens for an eye. Its body is primarily green Technic bricks, with a grey motor and gears visible on the side. The legs are made of grey and green Technic beams. The rear of the robot features a grey and green structure that resembles a sleigh or a reindeer's hindquarters, with two black wheels. The background is white with large, light blue snowflake graphics.
